

The Farming & Grazing for Profit school

"Amazing! A brilliant course for people who want the information & skills to go forward with a financially & ecologically profitable farm."

Tim Maxwell – Gulgong, NSW

"Came down kicking and screaming, left feeling enthusiastic. How to reinvent your idea of farming for the next generation. Give nature some love in return!"

Karen Royce – Geraldton, WA

"A great way to extend knowledge and shift paradigms of conventional farming to a holistic and regenerative approach. To improve land health, animal health and overall production."

Stephen Craig – Naracoorte, SA

Join thousands of graduates from across Australia and find the breakthroughs you've been looking for to increase profit, improve the health of your land and the relationships in your business, and enhance your satisfaction with your property.

The **Farming & Grazing for Profit** School provides a holistic insight into the many factors that can affect your business. Nothing is treated in isolation.

Hamilton, VIC: 1-7 July 2021

What if...

...you could shift your farming business up a gear?

What if...

...you could leave your land in better condition?

What if...

...you could achieve balance and control in your life?

What if...

...in seven days, you could learn the skills to do all this?

You can.

Through the **Farming&GrazingforProfit** School, you will be able to:

BUSINESS

- Understand and use key reports and financial indicators to identify your true financial position – what's working, what's not, and what you can do about it.
- Develop cashflow planning and budgeting skills.
- Comprehend finance, including how your bank manager thinks, what he looks for and how you can build a better relationship with him.
- Learn from what the leaders are doing.

LAND

- Implement the RCS Regenerative Grazing Principles and RCS Regenerative Cropping Principles so your land can be passed on to future generations in better condition.
- Reduce inputs and maximise soil health and production potential through unlocking the power of soil micro-organisms.
- Understand and manage the ecological indicators - soil health, biodiversity, water cycle and energy flow.
- Manage seasonal and climatic variation, and become more resilient to extremes.
- Design your property to maximise utilisation.

LIVESTOCK

- Understand the relationship between economics, animals, farming and grazing.
- Identify the strengths and weaknesses in your herd/flock and manage to maximise gross margin.
- Design a supplementation program to get more from your stock.
- Use tools such as grazing charts to make big decisions simple.

PEOPLE

- Solidify personal and business visions and goals.
- Identify the people assets within your business and allocate roles and responsibilities appropriately.
- Think critically and strategically about your business.
- Conduct effective business/family meetings.
- Build communication, decision making and time management skills to reduce pressure on yourself and your relationships.
- Know and communicate the importance of a succession strategy.

About our facilitators

The **Farming&GrazingforProfit** School is delivered in one seven-day block, face-to-face with your facilitator and other school participants. The teaching style encourages teamwork and group interaction, and suits the range of learning styles that exist in adult audiences.

David McLean provides a refreshing combination of hands-on experience, technical knowledge, facilitation skills and high level analysis. David's background, combined with his professional approach, has led him to become a highly sought-after presenter, educator and consultant across Australia.

Matthew Barton is regarded as a leader in the implementation of commercial scale pasture cropping systems. Matt offers first-hand experience to show how the principles taught in the **Farming&GrazingforProfit** school confront modern agriculture's natural resource management challenges.

Nic Kentish brings to our schools extensive experience in all areas of regenerative agriculture, including horticulture, cropping and grazing management. With his very personable and relatable style, Nic endeavours to see land, animals and humans together realise their true potential.
